

Dymind DP-H10

Auto Hematology Analyzer

The DP-H10 is a compact and efficient automatic hematology analyzer that integrates CBC, CRP, and SAA testing in a single device. Designed for point-of-care testing (POCT), it delivers fast, accurate, and reliable results, making it ideal for hospitals, clinics, and emergency diagnostics.

Key Features and Advantages

3-in-1 Comprehensive Testing

Simultaneous CBC (Complete Blood Count), CRP (C-Reactive Protein), and SAA (Serum Amyloid A) analysis.

Compact & User-Friendly

Small footprint, intuitive touch screen, and easy-to-use interface for seamless operation.

Rapid & Accurate Results

Provides precise hematology readings in minutes, enhancing diagnostic efficiency.

Minimal Sample Requirement

Requires only a small blood sample, making it ideal for pediatric and emergency care.

Why Choose DP-H10?

Comprehensive 3-in-1 testing in a single device

Fast, precise, and user-friendly operation

Compact design with seamless data connectivity

Technical Specifications

Parameter	Value
Parameters	CBC + CRP + SAA
Throughput	60 tests per hour for high efficiency
Sample Type	Whole blood & capillary blood
Sample Volume	Minimal blood required
Display	Intuitive touchscreen interface
Connectivity	LIS/HIS compatibility for seamless data management
Size & Weight	Compact and lightweight, perfect for POCT settings
