

The Aquarius Vital Sign Monitor

is a cutting-edge patient monitoring solution designed for real-time, accurate, and comprehensive vital sign tracking. Ideal for hospitals, clinics, and emergency care, it ensures efficient patient monitoring with advanced features and a user-friendly interface.

Key Features & Benefits

- Comprehensive Vital Sign Monitoring**
Tracks NIBP, SpO₂, ECG, Temperature, and Respiration
- High-Precision & Real-Time Data**
Provides accurate, continuous monitoring for critical decision-making
- User-Friendly Interface**
8-inch high-resolution touchscreen with an intuitive layout
- Portable & Lightweight**
Compact design for easy transport and bedside use
- Extended Battery Life**
Long-lasting battery ensures uninterrupted monitoring
- Connectivity & Data Integration**
Seamless HIS/LIS integration for efficient patient data management

Technical Specifications

Display:

8-inch high-resolution touchscreen

Measured Parameters:

NIBP, SpO₂, ECG, Temperature, Respiration

Battery Life:

Long-lasting rechargeable battery

Portability:

Lightweight and easy to carry

Connectivity:

HIS/LIS integration for real-time data sharing

Alarm System:

Customizable alerts for patient safety

Why Choose Aquarius Vital Sign Monitor

High-accuracy real-time monitoring

Portable and easy to operate

Seamless data connectivity
