

NeoECG T180

Advanced Handheld ECG Recorder

The NeoECG T180 is a state-of-the-art portable ECG recorder designed for quick, accurate, and real-time cardiac assessments. Its compact size, AI-powered analysis, and wireless connectivity make it an ideal solution for healthcare professionals, home monitoring, and telemedicine applications.

Key Features & Benefits

High-Precision ECG Recording

Single-lead & 6-lead ECG options for comprehensive cardiac monitoring.

Wireless & Cloud Connectivity

Bluetooth & mobile app integration for seamless data transfer.

AI-Powered ECG Interpretation

Real-time analysis helps detect arrhythmias, AFib, and other abnormalities.

User-Friendly Operation

One-touch recording with a clear OLED display for instant results.

Compact & Portable Design

Lightweight, pocket-sized device for easy on-the-go use.

Long Battery Life

Rechargeable battery ensures continuous monitoring without interruptions.

Technical Specifications

Leads	Compatible with multiple urine reagent strips
Screen	OLED display for clear ECG waveform visualization
Connectivity	Bluetooth & cloud integration for remote access
Power	Rechargeable battery for extended usage
Size & Weight	Ultra-compact and lightweight for easy portability
Software	AI-based ECG interpretation for enhanced accuracy

Why Choose NeoECG T180?

AI-powered ECG analysis
for accurate results

Portable, wireless,
and easy to use

Instant ECG report
sharing via mobile app
